

Local Linking Events January & February 2018

Action Towards Inclusion (ATI) is a new £7.4 million project that is taking place across York, North Yorkshire and East Riding. It's part of the national Building Better Opportunities (BBO) programme and aims to tackle poverty and social exclusion by helping people to overcome barriers and move closer towards education, training, job-search and employment.

The project is open now and runs until the end of September 2019.

We want to link in with local organisations and providers so that we can ensure this project adds value and compliments existing provision. We also hope that these events will provide a useful forum to explore potential referral pathways and progression routes for participants.

At these events you can:

- Learn more about ATI and what it is all about
- Meet the local delivery partners who will be supporting participants in your area
- Find out how to make referrals into the project
- Share information about existing/complimentary provision and progression pathways
- Network and build links with local providers and agencies
